

## 140C05 Electronic Blocks LED RGB

140C05 Electronic Blocks LED RGB

A, product parameters:

Size: 25 \* 21 mm

Weight: 4 g

Color: full color red, green, blue three primary colors

Brightness: highlight

Voltage: 5 v

Input: digital level

Interface: the Arduino 4 p interface

Platform: the Arduino, single chip microcomputer

Second, the product features:

Tricolor principle according to the multiple colors

Through the PWM port control to realize full color display

Arduino PWM interface can be driven directly

Three, module function test

Hardware requirements

Arduino x 1 controller

USB cable (1

Full color LED module by 1
